

# WHY THE UK FOR DIAGNOSTICS?

The UK infrastructure of the NHS healthcare system alongside a rich innovation ecosystem comprising industry, start-ups, charities, world-leading academia and dedicated Government funded research and evaluation centers, offers the ideal environment for the development of cutting-edge diagnostic products and services.

*"By pioneering a new focus on prevention and early diagnosis, and by harnessing the transformative power of treatments such as cell and gene therapies, we can go further than ever before in meeting the economic, social, and moral imperative of levelling up world class health outcomes across the land."*

Prime Minister Rt Hon Boris Johnson, MP

The UK has a vast array of products and services that can help healthcare providers globally to detect diseases early and accurately, to guide the right treatments, all whilst driving cost efficiencies.
